	Examiner Mitchell R Slavitt	Art Unit 2651	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. Claims 1-6 are allowed as the prior art does not teach or suggest the applicant's invention. Independent claim 1 teaches a magnetic disk drive. The distinguishing elements of the claim are a signal superposing means for merging two or more types of transmission lines into a single type of transmission line on the preamplifier side of a spring load position of a suspension, the two or more types of transmission lines transmitting control signals for the two or more types of control function units; and signal separating means for dividing the single type of transmission line into two or more types of transmission lines on the magnetic head side of the spring load position of the suspension. The Examiner interprets the claim as within the scope of 35 U.S.C. 112, 6th paragraph. The claim is therefore construed to cover the corresponding structure, material, or acts described within the specification at paragraphs [0024], [0025], and [0026]. Independent claim 6 teaches a magnetic disk drive. The distinguishing elements of the claim are a signal superposition element that receives first and second signals

Art Unit: 2651

and combines them to provide a combined signal directed along the transmission line segment spanning the spring load position toward the magnetic head; and a signal separation element of the suspension that receives the combined signal after the combined signal has traveled past the spring load position, and directs separate signals along first and second transmission line segments to the first and second control function units, respectively, to provide the first and second control signals.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R Slavitt whose telephone number is (703) 305-2809. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R Hudspeth can be reached on (703) 308-4825. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
